

Ali Mokdad

Experienced React.js developer seeking a Junior React.js Developer position. Passionate about creating innovative web applications and eager to contribute expertise to a collaborative team environment.

Work Experience

NextJs Front End Web Developer - SoftMachine

Dec 2023 - Present

- Developed front end components using Next.js, ensuring efficient rendering and optimized performance for an ERP system.
- Demonstrated flexibility with API integration, proficiently handling POST and GET requests to enhance system functionality and data retrieval.
- Leveraged Material-UI (MUI) components and CSS for designing and styling user interfaces, maintaining consistency and usability across the application.
- Collaborated with cross-functional teams to analyze requirements, implement features, and ensure seamless integration of front end components within the ERP system

Full Stack Intern - Iss Software

Jan 2023 - May 2023

- Developed a robotics remote control system for a machine using Python, enhancing machine functionality and control capabilities.
- Designed and implemented a website using Vanilla JavaScript and CSS for front-end development, ensuring an intuitive and visually appealing user interface.
- Utilized Node.js and Express.js for back-end development, enabling seamless communication between the website's front end and MySQL database.
- Collaborated with team members to troubleshoot issues and implement solutions, fostering a collaborative and innovative work environment.
